- ITIL v3 Foundation, 2011 – Exin
- Lean Value Stream Manager, 2013 - IBM

WORK EXPERIENCE:

I.T. Cognos BI Senior Developer, IBM Brazil, September 2010 to present

Current project:

- Create the Logical Data model using Cognos Framework Manager following the best practices, star schema relationship, applying security, creating pre-defined filters and macros to speed up future changes.
- Create Cubes using Cognos Transformer.
- Provide estimate sizing to the management team, helping the Development Team to understand the baseline requirements, distributing tasks among the developers, and evaluating the results.
- Develop reports using Cognos Report Studio, Cognos Workspace Advanced and Active Reports
- Migrate reports from DB2 to Netezza
- Led calls with the customer and management team to discuss outstanding points and negotiate alternative solutions for some specific issues.
- Ensured the deliverables quality, by testing and validating the solution before submitting to the customer, and helped the project manager to control the plan, by keeping the RTC (Rational Team Concert) tasks updated
- Work in iterations following the scrum methodology

System Administration:

- Server management, manage security/access levels, maintain profiles, maintain LDAP groups
- Manage services offered through multiple web hosting companies and the internet service provider
- Work on defects and improvements

Asset Management:

- Assets reuse: JavaScript codes, report templates, CSS and HTML

Previous project:

- Migrate reports from Hyperion to Cognos (including write the specifications, create the data model and develop the reports)
- Create dashboards to give to the customer an overview of the data and applying drill through to the detail reports
- Load and transform data from databases (or csv files) to a Data Warehouse
- Documented findings in a clear, detailed and objective manner
- Created test cases and test suites
- Training and Mentoring leader to spread the knowledge into the organization
- Continuously improved knowledge participating in workshops and trainings
- Communicated pertinent information to project leaders and to the architect

OTHER ACTIVITIES AND EXPERIENCE:

- Web Developer (PHP, JSP, HTML5, CSS3, JavaScript, Node.js)
- IT Developer (VB, Java, C#)
- Database: DB2, Netezza, SQL Server, MySQL, MongoDB
- Develop several systems when worked for Federal Express Corp - FedEx (2002-2009)
- Mobile developer by hobby (Xamarin, Android, Phone Gap)
